We are past the interim now, project closes the end of Aug.
We will have all the lab data very soon and I think the state is satisfied at this point.
I plan to start on the final report in the next few days so if we can have a 30 day extension time would be adequate for completion your review and any other state request that you would like us to complete.
Thanks
Heth

Proceed with NMED request as per the estimate from Kristie. Give me an estimate of the additional time that you think you will need and a justification and I will talk to Eric and Greg.

Yes, the current TDD funding is adequate; however we have less than 5 weeks remaining on the POP.
An extension is probably going to be needed considering the complexity of the data package and the number of agencies involved.

Is this within the current budgeted hours for the TDD? Please advise

Warren,

We estimate that this task will take approximately 12 hours. This includes performing the calculations required to get the information requested by NMED, modifying the lab EDDs to include this information, and modifying the data set memos to include a summary of the task.

I don't have a major problem with this. My only concern is that this can be a substantial effort in # of hours. If this is within the budgeted hours, proceed. If not, please forward an estimate of hours to do this to myself and Eric.

Subject: Las Conchas NMED Request

Eric and Warren,

Mike Ortiz has requested additional information and review of the data. The documentation requested includes Eberline's SOP for calculating results. This information was provided upon request (and is attached above for your reference). Understandably, NMED is performing a very thorough review of the data to make sure it is consistent with existing data. Based on the level of review, we indicated to Mike that the level 4 data packages could be made available to him, if requested.

In addition to the documentation, NMED has requested that EPA/START blank correct the sample results. I spoke with the CHP, Rick Haaker, and this is certainly something we can do, but wanted to get your approval before we proceed. If we proceed with blank correcting the results, all data that was published early this morning would get updated after this additional review.

Please advise. Thanks!

Kristie
